

CITY OF NEW BERN
Medium General Service–CP Rate
Schedule 12

AVAILABILITY

This Schedule is available on a volunteer basis for electric service used at a single point of delivery, at one of the City's standard voltages, used by any non-residential Customer with a monthly demand of 30 kW or greater, but less than 750 kW for at least three of the preceding twelve months. Also, this Schedule is available as an alternative to those customers who are currently being served under the Medium General Service Rates (Schedules 8 and 10) and Medium General Service Time-of-Use Rates (Schedule 11).

This Schedule is not available for: (1) residential service; (2) breakdown, standby, or supplementary service unless used in conjunction with applicable standby or generation service rider for a continuous period of not less than one year; (3) resale service; (4) or whenever the monthly demand exceeds 750 kW for at least three months. In order to determine the applicable rate schedule for a Customer, the City will review that customer's monthly readings once a year in one-year increments from the month that the Customer first started receiving bills under a new Schedule.

INITIAL FEES

The Customer will be billed for the actual cost for the City to purchase and install the CP meter facilities, communications equipment, and any associated load management equipment as required by the City.

MONTHLY RATES

Customer Charge	\$99.05 per month
Energy Charge	
All kWh	\$0.0723 per kWh
Demand Charges	
Coincident Peak Demand	\$22.46 per kW
Excess Demand	\$6.31 per kW

DETERMINATION OF BILLING DEMAND

Coincident Peak Demand shall be the average kW demand measured in the 60-minute interval used by the North Carolina Eastern Municipal Power Agency for wholesale billing purposes during the corresponding month of the customer's billing.

Excess Demand shall be the highest 15-minute demand recorded during the current billing month, less the Monthly Coincident Peak Demand for the current billing month.

NOTIFICATION BY THE CITY

The City will use diligent effort to predict each monthly system peak and notify the Customer in advance; however, the City is not able to guarantee an accurate prediction, and notice will be provided. Notification by the City will be provided to the Customer by direct telephone communication or automatic signal, as mutually agreed. The Customer will hold the City harmless in connection with its response to notification.

POWER FACTOR CORRECTION

Where the power factor of the consumer's installation is less than 85%, the City may correct kWh consumption for the month by multiplying by 85 and dividing by the actual power factor.

SALES TAX

To the above will be added any applicable North Carolina sales tax.

PAYMENT

Bills are due when rendered and are payable with 15 days from the date of the bill. If any bill is not so paid, the City has the right to suspend service in accordance with its Service Regulations.

CONTRACT PERIOD

The Contract Period shall not be less than one year; except for short-term construction or temporary service, the Contract Period may be for the period requested by Customer and in such event Customer agrees:

- (1) That the service supplied shall be for a continuous period until disconnected, and
- (2) That where it is necessary for the City to extend lines, erect transformers, or do any work necessary to supply service, except the installation of a self-contained meter, the Customer shall pay for the line extension in accordance with the City's Line Extension Plan.

GENERAL

Service rendered under this Schedule is subject to the provisions of the City's Service Regulations and any changes therein, substitutions therefore, or additions thereto lawfully made.

Effective for bills rendered on and after February 1, 2009.
