

CITY OF NEW BERN
Small General Service #1
Schedule 03

AVAILABILITY

This schedule is available for electric service at a single point of delivery, at one of the City's standard voltages, used by any non-residential customer with monthly energy readings of less than 2500 kWh for a least ten of the preceding twelve months. When the Customer's monthly energy has equaled or exceeds 2500 kWh for at least three of the preceding twelve months, the City may install a demand meter to determine the maximum 15-minute demand and begin billing the Customer for demand under Small General Service Schedule 04.

This schedule is not available: (1) for residential service; (2) for resale service; or (3) whenever the monthly energy equals or exceeds 2500 kWh for at least three of the preceding twelve months. In order to determine the applicable rate schedule for a customer, the City will review that customer's monthly readings once a year in one-year increments from the month that the customer first started receiving bills under a new schedule.

When the Customer has installed generating or converting equipment that can operate in parallel with the City's service, the Customer shall install the protective equipment acceptable to the City that will protect the City's employees, its other customers, and its distribution system. The City shall have the right to suspend delivery of electricity to the Customer with such generating or converting equipment until the Customer has installed the protective equipment.

APPLICABILITY

This schedule is applicable to all electric service of the same available type supplied to customer's premises at one point of delivery through one meter.
